

# McAfee VirusScan Mobile

## Proven Security on the go.

**Mobile devices are the next frontier for hackers and virus writers. Malware for mobile devices is growing faster than it did in the early days of the PC. Take preventive measures to secure your mobile device today.**

Mobile security is essential to stay connected to friends and family while protecting sensitive personal information and irreplaceable data such as photographs and contact information. McAfee, Inc. provides a mobile security solution that protects mobile devices from viruses, secures personal information and helps ensure critical communication functions always work.

## Be Smart. Secure your mobile device.

All mobile devices that access the Internet and receive or send text messages are vulnerable to malware. Some devices, known as smartphones, can obtain viruses from downloading and installing an application.

McAfee® VirusScan® Mobile automatically secures your device; it scans and cleans files, e-mails, Internet downloads, text messages, and attachments.

- Always-on protection identifies and removes viruses, Trojans, worms, and other malicious applications without interrupting your connections.
- It detects at multiple entry and exit points, including e-mail, instant message attachments, Internet downloads, SMS, MMS, WiFi and Bluetooth.
- Inline cleaning automatically cleans infections when viruses, worms, Trojans, or other threats are found.
- Mobile-based technology prevents new threats like the “Commwarrior” virus.

## Comprehensive and silent security.

McAfee VirusScan Mobile is designed to provide comprehensive protection at all points of potential vulnerabilities so you don't have to hassle with security. Your inbound email, outbound email and Internet downloads, are protected with on-access scanning, on-demand scanning, mass-mailing behavior detection and malicious script detection.

McAfee VirusScan Mobile protects your device from malware.

McAfee VirusScan Mobile requires minimal mobile resources, allowing you to use device functions, including your phone, without interruption.

- The VirusScan Mobile application is designed specifically for the phone operating system in which it is installed.

Requires only 850K of space so download and installation is fast and easy. Uses few phone resources for operation, so it won't interrupt a call or other phone function.

## Prevent the spread of viruses to friends, family and coworkers

Mobile viruses can spread to contacts you have stored on your mobile phone. McAfee VirusScan Mobile helps prevent the unintentional sending of infected text messages, and/or e-mail attachments to friends, family and co-workers.

- MMS, SMS, and E-mail attachment scanning scans attachments as they are received or as they are sent.
- Future-proof protection is provided by scanning all file system access, regardless of entry method. WiFi, Bluetooth and all other methods of entering your device are protected by VirusScan Mobile.
- 24/7, worldwide virus outbreak monitoring by McAfee's Anti-virus and Vulnerability Emergency Response Team (AVERT®) - AVERT continually monitors worldwide virus activities and provides fast and comprehensive protection to VirusScan users.
- The McAfee subscription model ensures your device can be protected as long as you own your phone.

## Get the confidence of always-on, always up-to-date security

It's a hassle to keep track of security updates and warnings, but with McAfee you don't have to worry. Our comprehensive, proven products feature automatic updates, and our unmatched security expertise ensures that you always have the latest protection.
