

Create custom packages to quickly bring your own devices to AT&T

Premier Online Store

Release Notes

April 2017

Create custom packages to quickly bring your own devices to AT&T

Overview

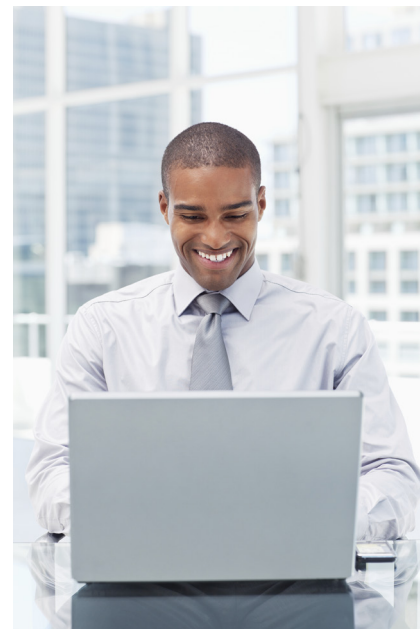

Bring-your-own-device custom packages

Enterprise and Small Business company administrators: Create custom packages that bundle the rate plans and features you use most to make shopping a breeze. You and your Corporate Responsibility Users (CRUs) can then add a custom package to the Shopping Cart in just one click.

You'll create your custom package after completing the **Bring Your Own Device** page. Simply add a rate plan and other selections to the **Shopping Cart**, and then click **Save as custom package**. Up to 10 bring-your-own-device custom packages can be created and saved.

Premier allows you and your CRUs to:

- View the saved custom packages on the Premier Online Store **Bring Your Own Device** page.
- Add a custom package to the **Shopping Cart** in a single click.

Images provided in this presentation are for illustrative purposes only.

Create custom packages to quickly bring your own devices to AT&T

Accessing the Bring Your Own Device page

Getting started

On the **Start Shopping** page, select **Yes** or **No**, and then **Set up new service on a device you already own**. Next enter your ZIP code, and click **Continue** to go to the **Bring Your Own Device** page.

The screenshot shows the AT&T Premier 'Start Shopping' page. At the top is a navigation bar with links for PREMIER STORE, MANAGE, BILLING, SUPPORT, and a shopping cart icon. Below the navigation bar, the page title 'AT&T Premier' is displayed. Underneath, there is a 'Start Shopping' section with two links: 'Shop for Accessories' and 'Retrieve Saved Cart'. The main content area is divided into three steps:

- Step One:** 'Do you want to create a new billing account?' with radio buttons for 'Yes' (selected) and 'No'.
- Step Two:** 'What would you like to do?' with three radio button options: 'Buy new service/new phone number with phone/device', 'Transfer number from another service provider', and 'Set up new service on a device you already have' (selected). The selected option is highlighted with an orange box.
- Step Three:** '* ZIP code where device will be used most often' with a text input field. Below it is a checkbox for 'I want to port (transfer) a number to AT&T.' and a note '* Required'.

A blue 'Continue' button is located at the bottom right of the form.

Saving your selections as a custom package

Create and save your custom package

The **Bring Your Own Device** page opens.

- Identify the device and select a SIM card option.
- Click **Select a Plan** to shop for and add items to the cart that meet your organization's requirements. At a minimum, include a voice and data plan, or Mobile SelectSM plan. You can also add features. (Not shown.)
- Save your selections as a custom package, in the **Shopping Cart** by clicking **Save custom package**. Then enter a unique name for your package, and click **Save**.

Premier Online Store updates in near-real time and your custom package appears on the **Bring Your Own Device** page.

One-click shopping for you and your CRUs

To shop bring-your-own-device custom packages, you or your CRUs complete the **Start Shopping** page. ([See page 3](#)).

The **Bring Your Own Device** landing page opens.

You or your CRUS:

- Identify the device and select a SIM card option. Available packages compatible with the identified device appear on the page.
- A custom package can be selected by clicking **Add to Cart**.
- In the **Shopping Cart**, review the order and click **Checkout**.

Bring-your-own-device custom packages

More information

- Custom packages save you and your CRUs time by:
 - Establishing pre-approved selections.
 - Providing one-click shopping.
 - Removing the need for order approval.
- To view the package details, you and your CRUs can click the package name to open the package details window.
- On the **Bring Your Own Device** page, only company administrators can see if a custom package contains discontinued Rate plans and features. You can then delete these packages.
- The bring-your-own-device custom packages you set up are also available to users porting their service to AT&T from another provider.
- To port a number, the device must be unlocked by the current provider.
- If you or your CRUs want to port a number to AT&T, follow the initial steps on the [page 3](#), and check the **I want to port (transfer) a number to AT&T** box. Complete the information to port a number and then click **Continue** to follow the one-click shopping steps on [page 5](#).
