AT&T Control Center
AT&T M2M Business Solutions

Rapid scale
Choose AT&T Control Center and get global visibility into the activity of all your SIMs on the AT&T network, but more than that, use this proven platform to:
- Drive efficiency and profitability, empowered with robust self-service tools for provisioning, real-time diagnostics, usage controls, and more.
- Streamline operations and scale faster with a powerful automation engine.
- Gain strategic insight and manage your business with an unparalleled depth of intelligence.

Intelligence
Analyze and control how your devices work in the field, so you can respond immediately to market conditions and customers’ needs. AT&T Control Center makes it easy by giving you a unique, real-time view of how your devices are connecting to and using the AT&T network—across all points of connection.

Automation
Streamline your business processes and scale faster using a powerful automation engine to programatically control your devices. Monitor SIMs, usage, rate plans, or other elements of your connected device business and trigger actions to run automatically when critical events occur.

Empowerment
Tailor the AT&T Control Center platform to your specific business model. Set logistics requirements, define custom commercial terms, and even enable distributors and customers to manage connected devices depending on your business needs. Drive efficiency and profitability with advanced, yet easy-to-use, self-service capabilities.

AT&T Control Center product overview
AT&T Control Center, powered by Jasper, is a sophisticated, cloud-based platform offering unique capabilities that enable you to launch, manage, and rapidly scale your connected device business or enterprise deployment.

Accelerate your time to market, run your operations more efficiently, and optimize the profitability of your connected device initiatives.
Gain strategic insight

Get the intelligence you need to manage your connected device business for maximum efficiency. AT&T Control Center puts everything from data utilization and costs to performance and provisioning status at your fingertips. You’ll see important usage trends, which devices are the most costly, and whether your devices are working as expected in the field.

Integrate quickly with your own applications

Manage your operations more efficiently and control devices directly from your own applications. Use standards-based API messages to access data in the AT&T Control Center. From day one, you will be able to use your own applications to monitor usage, send messages to devices, assign rate plans, get invoice data, and more.

Troubleshoot problems instantly

Run detailed diagnostics on any device, online and in real-time, whether on the AT&T network or roaming internationally. Check provisioning status, see connection session history and view real-time connectivity status. Immediately identify connectivity issues and get the information you need to get them resolved quickly.

Control costs

Start with a no-touch activation experience—automatically activating your devices on the network as soon as your end users or installers switch them on in the field. Then utilize automated overage controls, notifications, and rules to control costs once your devices are in use. Eliminate manual efforts and use the automation engine in the AT&T Control Center to save time and money.

Program rules... without programming

Set custom rules easily in the AT&T Control Center user interface. Decide how you want your business run and let the platform do the rest. Instantly. Automatically.

It’s as simple as 1, 2, 3:
1. Monitor SIM behavior or other events.
2. Decide what condition will trigger the rule.
3. Set an action to run automatically when that condition is met.

Choose commercial and global flexibility

Reach new markets quickly and easily by choosing a global platform. Select post-paid, pre-paid, pooled or individual rate plans. Set high or low usage that varies by geography or type of data traffic. Enable trial services and push offers to end users. It’s your choice. Ensure that your rate plans, distribution and operational logistics work to suit your needs.

See for yourself

Start with a developer kit and get instant, hands-on experience with the power of AT&T Control Center. It’s the fastest way to get started connecting your devices to the AT&T network. With trial SIMs and full access to the platform—including diagnostic tools to help with development and APIs to integrate with your applications—see how easy it is to get to market quickly, control costs, improve efficiency and grow your business.

For more information, contact:

AT&T Control Center (“ACC”) is available only to a qualified AT&T enterprise and government customer with a qualified AT&T agreement (“Qualified Agreement”). ACC is subject to (a) the Qualified Agreement; (b) applicable Sales Information; (c) the additional terms and conditions found at http://jasper.com/terms.pdf (the “Additional Product Terms”). For AT&T’s government customers on a Qualified Agreement: Any Additional Product Terms not allowable under applicable law will not apply, and the Qualified Agreement will control in the event of any conflict between the Qualified Agreement and the Additional Product Terms. May not be available for purchase in all sales channels or in all areas. Additional hardware, software, services and/or network connection may also be required. Availability, accessibility, security, delivery, speed, timeliness, accuracy and reliability are not guaranteed by AT&T. Additional fees, charges, taxes and other restrictions may apply. Offer subject to change.

Customer Personal Data (“CPD”) may be transferred to or accessible by (i) AT&T personnel around the world (ii) third parties who act on AT&T’s or AT&T’s supplier’s behalf as subcontractors; and (iii) third parties (such as courts, law enforcement or regulatory authorities) where required by law. Customer will only make CPD accessible when it has the legal authority to do so and any necessary consents. Customer will camouflage or securely encrypt CPD. CPD includes, without limitation, name, phone number, email address, wireless location information or any other information that could or does identify Customer or its end users. Customer is responsible for providing end users with clear notice of AT&T’s and Customer’s collection and use of CPD obtained via this offer, for obtaining any necessary end user consents, and for complying with, and advising end users about, AT&T’s Privacy Policy at http://www.att.com/gen/privacy-policy?pid=2506.
